Summary

Product Manager with 15+ years of experience specializing in AI-driven, data-intensive B2B platforms. Deep expertise in translating complex data and AI capabilities into scalable product experiences — from discovery through delivery. Proven track record defining product strategy, prioritizing roadmaps, and driving measurable outcomes at the intersection of AI, data infrastructure, and enterprise user needs. Strong partner to Engineering, Data Science, and Leadership teams.

Experience

Product Manager - *Bright Data*
Mar 2025 – Present

- Lead product strategy & vision for AI-driven, data-intensive B2B platform solutions, aligning product goals with enterprise customer needs.
- Drive end-to-end product discovery & execution, transforming complex data infrastructure and AI capabilities into scalable, high-impact product features.
- Define product roadmaps & prioritize features using data-informed decision frameworks to maximize business impact and user value.
- Partner cross-functionally with Engineering, Data Science, UX, and Executive Leadership to deliver robust, enterprise-grade data solutions from concept to rollout.
- Establish key metrics & KPIs to measure feature performance, adoption, and reliability across dynamic data platform workflows

Senior Manager, Product Design (UX & Strategy) - *ZoomInfo*
Apr 2021 – 2025

- Owned problem definition and prioritization for large-scale, data-heavy B2B products, partnering with Engineering and Data to define roadmap direction and delivery plans
- Led discovery processes that informed product strategy and roadmap decisions
- Shaped product initiatives balancing usability, business impact, and technical constraints
- Partnered closely with Product, Engineering, and Data to translate insights into actionable product decisions
- Led definition and rollout of AI-driven features, owning behavior design, edge cases, and trust considerations to support adoption and reliability
- Mentored designers to think in terms of outcomes, trade-offs, and product impact

Principal Product Design Lead (UX & Data Platforms) - *Liveperson*
2018 – 2021

- Mentored and guided designers while aligning their work to product goals, priorities, and outcomes
- Collaborated with global, cross-functional teams to ensure shared understanding of product direction and constraints
- Contributed to defining and scaling product systems and standards to support consistency and long-term growth
- Shaped data-driven product experiences, including data visualization, conversational flows, and content structures
- Drove accessibility decisions as part of core product requirements for complex systems
- Initiated and delivered innovative product concepts, from problem definition through validation
- Coordinated and prioritized work across multiple parallel initiatives, balancing scope, timelines, and impact
- Led and partnered on user research and usability validation to inform product decisions with internal and external stakeholders

Education

B.De in Visual Communication Design - *HIT*
2001 – 2004

Expertise

- AI product strategy & feature design
- Data platform product management
- B2B enterprise product lifecycle
- Roadmapping & prioritization frameworks
- Metrics, KPIs & success criteria
- Stakeholder alignment & decision-making
- Cross-functional team leadership

Knowledge and skills

- AI/ML product workflows & tooling
- Data visualization & analytics platforms
- Figma, Sketch, Zeppelin
- Confluence, Jira & product ops tools
- Accessibility standards & compliance
